

CREATE A SAFE ENVIRONMENT FOR MORE PRODUCTIVE LEARNING

OUR INTEGRATED
COMMUNICATION SOLUTIONS
ENHANCE SCHOOL SAFETY
AND IMPROVE EFFICIENCY

MORE THREATS, LESS MONEY, GREATER NEED FOR SAFETY

From college campuses to K-12 classrooms, educators are looking for better communication solutions to help keep students and staff safe, especially as violence and crime in schools escalate.

Analysis shows that there has been a £5.4 billion cut from school budgets in England since 2015 (1). Despite limited resources and leaner budgets, administrators acknowledge that instant, reliable communication is one of their most urgent concerns. Almost 40 per cent say they need an updated system for daily operations - particularly for emergencies.

OVERCOME CHALLENGES BY IMPROVING SCHOOL COMMUNICATIONS

We know that your district is constantly being pressed to boost student safety and increase staff efficiency on an ever-shrinking budget. Our instant, reliable communication solutions excel at helping keep students and staff safer, tracking bus fleets accurately, and improving overall efficiency - with flexible options you can afford.

When you equip your staff and bus fleet with Eemit's digital communication solutions, they can connect directly to each other, wherever they travel, and connect directly to first responders instantly, should an emergency arise.

COORDINATE AND COLLABORATE INSTANTLY TRBOCALL TWO-WAY RADIOS

TRBOCALL two-way radios unify your staff and fleet with instant, always available communications, anywhere they go. When emergencies arise - from an injured student to an intruder on campus - our two-way radios connect staff directly and instantly to one another.

Choose the right device for the right user, such as the ultra-thin Motorola SL 7550 portable radio or the Motorola XPR 5500 mobile with integrated Bluetooth. Wireless accessories let personnel interact freely, so bus drivers can keep their hands on the wheel and eyes on the road.

TRBOCALL integrates voice and data seamlessly, with enhanced features that are easy to use - including integrated Bluetooth, GPS location tracking, text messaging and Intelligent Audio that automatically adjusts volume to the environment. Whether a custodian is in a boiler room or a coach is in a crowded gym, you can be sure they will hear and be heard clearly.

CONNECT TO STAFF, ON ANY DEVICE, ANYWHERE

WAVE WORKS WITH GROUP COMMUNICATIONS

Leverage the resources you already have to communicate with employees on their own devices. WAVE extends your radio's reach to those who may not carry radios. Now the Head Teacher at a conference or the administrator away from campus can talk on their smartphones with radio users at school.

WAVE connects to virtually any device - smart phones, laptops, tablets, even intercoms and landlines - on any public or private mobile data network, including Wi-Fi. You get seamless and secure connectivity, affordable push-to-talk, and the freedom to keep service plans and devices.

WHEN EDUCATORS TRUST MOTOROLA, THEY TRANSFORM SCHOOL SAFETY

From playgrounds to lecture halls, our technology solutions are enabling students to learn, grow and thrive in a safe environment.

They're decreasing the amount of time it takes to connect to first responders in case of an emergency. They're increasing visibility into the events taking place at school, in the community and around the world.

They're protecting youth from the bus stop to the classroom and back again. And giving parents more confidence than they've ever had before - that their child will be able to reach their full potential in a safer school.
