

POC

POC DEVICES TELOX

01

MARKET LEADER

Telox are global market leaders in the world of Push-to-Talk over Cellular (PoC) devices. Working off cellular coverage, but acting as a hybrid between a smartphone and a two-way radio, PoC devices are growing in popularity - and Telox are at the forefront of a market that is set for continued growth.

£15.8 BILLION

The PoC global market is estimated to be worth £15.8 billion by 2032.

02

DEVICES IN ALL SHAPES & SIZES

Telex have an extensive portfolio of devices, all designed to boost worker safety, productivity, and efficiency. Their fleet includes handheld PoC devices, desktop mobile devices, and body cameras.

BOOSTING SAFETY & DRIVING EFFICIENCY

Telox devices are designed to boost worker safety with features like Lone Worker, dedicated panic alarms, and GPS location tracking,

And instant communication across a national scale helps to drive efficiency as more people can stay connected at once (and in different locations).
